COMPANY OVERVIEW

BrootTech LLC is a Virginia-based, founder-led cybersecurity company focused on scoped security assessments and technical engineering support for commercial and federal-facing organizations.

CORE CAPABILITIES

- AWS security configuration and baseline reviews
- Security-control evaluation and validation
- Detection engineering, alert quality and telemetry review
- Cloud and hybrid security architecture / automation

WHY BROOTTECH

- Direct, founder-led technical engagement
- Defined scope and decision-ready findings
- Real-world defense and mission-critical systems experience

FEATURED SERVICE

AWS Security Baseline Assessment

- 1 AWS account / up to 2 Regions
- Selected IAM, logging, network and data controls
- Risk-ranked findings and remediation roadmap
- Executive and technical readout

ENGAGEMENT MODEL

Written scope and authorization; approved least-privilege access; primarily read-only review; documented technical findings and prioritized next steps.

REGISTERED NAICS CODES

541519 (Primary) / 541511 / 541512 / 561320

SELECTED FEDERAL PSC CODES

DJ01 - Security and compliance support
DG01 - Network support services
DA01 - Application development support

FOUNDER QUALIFICATIONS, NOT CORPORATE PAST PERFORMANCE

Founder experience: 15+ years in defense-sector cyber evaluations, detection, AWS/hybrid systems, and security engineering. These individual qualifications are distinct from BrootTech contract history.
